PROFESSIONAL SUMMARY

Aspiring Data Scientist and Computer Science undergraduate with hands-on experience in Python, SQL, and data analysis. Skilled in exploratory data analysis, statistical analysis, data cleaning, and visualization to extract actionable insights from large datasets. Completed real-world data science projects on customer behavior segmentation and real estate market analysis involving 19,000+ records. Passionate about applying data-driven approaches and machine learning fundamentals to solve complex business problems.

SKILLS

Programming Languages: Python, SQL, Java

Data Science & ML Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn (fundamentals)

Data Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn

Development Tools: Jupyter Notebook, Git, GitHub

Core Competencies: EDA, Statistical Analysis, Data Cleaning, Data Wrangling, Predictive Analytics, Feature Engineering, Data Storytelling

EXPERIENCE

Python Programming Intern

VaultofCodes · Remote | Aug 2025

- Developed Python scripts for data processing and automation tasks, improving pipeline efficiency
- Performed data cleaning and exploratory data analysis (EDA) on structured datasets using Pandas, enhancing dataset quality for downstream analysis
- Applied core programming concepts including OOP, functions, and loops; strengthened debugging skills for reliable data workflows

PROJECTS

Customer Behaviour Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end data science workflow on 3,901 customer records — from data cleaning and feature analysis to behavioral segmentation — uncovering key purchasing patterns
- Conducted EDA with statistical summaries to identify high-value customer segments and behavioral trends
- Developed visualizations using Matplotlib and Seaborn to communicate data-driven insights and support business decision-making

Gurgaon Real Estate Market Analysis

Python, Pandas, Matplotlib

- Analyzed 19,516 real estate records to identify pricing trends, location-based market patterns, and high-growth investment areas across Gurgaon
- Performed data wrangling, transformation, and statistical analysis to improve dataset usability and extract actionable market insights
- Built visualizations highlighting key investment zones, enabling data-driven real estate decisions for stakeholders

EDUCATION

B.Tech in Computer Science Engineering

Integral University, Lucknow, UP | Aug 2024 – Jun 2028 | CGPA: 7.57 / 10

CERTIFICATIONS

- Data Analytics Certification — Integral University
- Linux Programming — Integral University
- AI Productivity Hacks — LinkedIn Learning
- Prompt Engineering for Generative AI — LinkedIn Learning

ACHIEVEMENTS

- Completed real-world data analysis projects on datasets exceeding 19,000 records independently as a first-year student
- Secured a Python Programming internship at VaultofCodes while in the first year of B.Tech
